

Needle Safe

An excellent gift item for your shop. It is a 2"x4½" plastic case with magnetic strips inside to hold all your needles. Small, flat embroidery scissors will fit, too. Fits perfectly into a purse or carrying case so you can always keep track of your needles! Pale Blue.

4059 Original Needle Safe

\$7.00

Large Needle Safe

Many embroidery scissors that were a little too thick to fit in the original size will fit in the new Large Needle Safe. Pale blue. 4¼"x2¼"x5/8" deep.

\$8.00

Scissors Keeper

Safely keep track of your scissors with the Scissors Keeper. Colorful magnet holds your scissors in the box to protect the points of the scissors as well as your fingers when searching the bottom of your tote! 2"x4" Scissors Keeper will hold most small embroidery scissors. Clear lid so you can see which scissors are inside. Scissors and needles sold separately. From Yarn Tree.

No Baste System

Hate to baste? Then the E-Z Stitch No Basting System is the ticket! Attach your fabric instantly to the scroll rods, remove it, and reattach it in the blink of an eye. Enables you to maintain the tension needed to produce even stitches. There are two parts to the system which is similar to velcro. Each has a sticky back.

The first part (for scroll rods) permanently attaches to the scroll rods and is reusable over and over. You can even retrofit your existing rods as it is easy to apply.

The second part (for fabric) permanently attaches to the project and is cut off after using. It is 3/8" wide. When you start a new project, you only replace the second part which goes on the fabric.

Once your customers start using the E-Z Stitch No Baste System, they will only need to buy the second part (for fabric). By American Dream Products.

Thread Heaven thread conditioner

Stop tangling and fraying with this new synthetic thread conditioner. Beeswax creates a sticky coating while this makes a slick coating that works more like ball bearings. Works especially well on metallics, silks, and rayon threads to make them more pliable and easier to use. Thread Heaven is chemically inert and will not react with the fibers. Blister packed. From Adam Beadworks.
